MIAMI & THE TROPICAL WORLD EXHIBITION

Through April 30: Explore building in the tropics as part of the Miami & The Tropical World Exhibition in the Korach Gallery through the end of April. This exhibition considers the challenges of building in the tropics. Defined geographically as the region between the Tropic of Cancer and the Tropic of Capricorn, nearly 40 percent of the earth’s surface area falls within the tropical world. The climate of the tropics are extreme – from deserts to rain-forests, and often unforgiving; victimized by repeated natural disasters. Perhaps due to this instability, economies are often limited as well, further effecting the outcome of the built environment. Learn more.
